

Passive Fire Protection Training - Dublin 7th - 8th November 2017

Two day course

Due to high demand for the last two successful training courses in Passive Fire Protection which was held in Dublin in June and October 2016 and February and June 2017, IFC are offering a repeat training course delivered by Colin Keeley of IFC group, one of the leading trainers in passive fire protection.

This IFC Group training is an excellent way of gaining the background knowledge for checking, undertaking site installations and maintenance of passive fire protection systems.

The training is independent from any 3rd party installer certification scheme however, where training is to be undertaken in advance of the competence assessment requirement of our sister company IFC Certification Ltd installer scheme, then the fees for the competence assessment will be waived. Further details of this scheme are available at www.ifccertification.com

The training will be undertaken at **Carlton Dublin Airport Hotel** over two days. If you wish to proceed with training please complete and return the 'Application for Training' form with your advance payment in Euros (NO VAT) to Karen Epps (karen.epps@ifcgroup.com) at IFC Group.

Day 1: Core Module; Penetration Seals	09.00 – 17.00
Day 2: Partitions; Cavity Barriers; Fire Doors	09.00 – 17.00

Core Module – Introduction to IFC, Building codes, Irish regulations, fire testing. This includes examples of real fires and what went wrong! Issues are explored and explained.

Penetration Seals – how holes are commonly sealed in buildings with examples.

Partitions – fire compartmentation and lightweight systems and ceilings for fire separation.

Cavity Barriers – Specific methods of protecting concealed spaces against the spread of fire and smoke.

Fire Doors – review of Fire Doors and doorsets including the specific components that make up timber fire doors. This will include frame, leaves, smoke and intumescent seals.

The course is designed for two days, it is possible to attend one day, however the core module sets the context for all subsequent modules.

Upon completion of the training, IFC will prepare formal certificates for each attendee of the training undertaken, following successful assessment of the individual modules.

In the meantime if we can be of any further assistance or you have any questions please do not hesitate to contact Colin Keeley (colin.keeley@ifcgroup.com) or David O'Reilly (Dublin) from ASFP Ireland (david.oreilly@asfpireland.ie)

Please complete the attached form and return (scanned email is acceptable) to:
